

## **Manufacturer: DataCollect**

### **Product Model: DSD Digital Safety Display**

Our latest generation of radar speed display combines many years of experience, innovation, and development from the world's premier manufacturer of road safety education systems. Developed with an industry-leading radar sensor, our DSD is capable of accurate measurement of speed from 2 mph (3 km/h). Physical enhancements include a lightweight case, reducing installation time to just 5 minutes.

### **Choose Between 3 Different DSD Models**

Each comes with advanced features that can be individually customized to your preferences.

#### **Flex-Display Features:**

- One or two-lined LED text
- Your individual text
- Adjustable type sizes
- Scrolling text for longer messages
- Static text or flashing mode

### **Your Site, Your Safety Message!**

We can place your city logo, company logo, individual picture, message, or skyline on the DSD.

### **myTrafficData Integration (DSD Smart & DSD Pro)**

Get real-time efficiency data with your device:

- What is the current vehicle speed level on this road?
- How many vehicles are traveling on this road?
- What vehicle speed reduction could be achieved by the use of the DSD?
